HISTORY

Invented at the beginning of the 20th century in England as a skin barrier cream for Industries. After World War II women began working in industries in Britain as there were few men left. **Exposure to harsh chemicals** caused damage to the skin, caused social issues and made work difficult. Also once the skin becomes rough, it takes a lot of time to heal completely no matter how much care is taken.

Dr. K B Alberman developed a special barrier cream on the basis of Skin Science called, “**Kerodex**”. It protects the skin by application before work. Since then, for more than **75 years** Kerodex has been protecting skin and hands of people across multiple industries.

WHAT ARE KERODEX BARRIER CREAMS?

A topical formulation applied to the surface of the skin as a **physical barrier to irritants** therefore preventing and providing protection from occupational skin disorders (OSDs). It forms a protective film over the skin and **protects against various chemicals, oils, grease etc.** It is said to act like an ‘invisible glove’ that protects the hands. When our skin is exposed to harsh chemicals, oils and diesel that leads to chemical burns, fisheries, acne, acid burns and boils that look ugly and a painful deteriorating condition of the hand skin getting hard, cracked and dry abrasions caused by constant friction. These issues can be prevented by the use of Kerodex cream.

ADVANTAGES OF KERODEX BARRIER CREAMS

01 It is Bacterical and acts as an artificial oily secretion

02 Effective even after washing your hands *

03 Conserves the ability of the skin to lubricate

04 Creates a clean plug of inert material

05 Avoids irritation to the skin and prevents roughening

06 Reduce Medical and Insurance Expenses

07 Reduce Training Costs and Loss of Production

08 Reduce Worker Turnover and Sick Days

09 Improve worker health and morale

10 Makes gloves more comfortable to wear

*Only applicable where the product has a water repellent cream base.

KERODEX WATER SOLUBLE BARRIER CREAMS

Effective against substances not involving aqueous solutions. It dissolves with sweat and heavy friction. Protection lasts 3 hours under normal conditions and gets pushed out by hydrostatic pressure.

Application for Water Soluble Barrier Creams

Before work 2 gms of the cream should be applied to clean dry hands up to the wrists and 4 gms upto the elbows. Re-apply every 3 hours under normal conditions. If the hand comes in contact with water during this period or due to sweating, it is essential to clean the hands and re-apply.

BENTONITE & KAOLIN LIGHT BARRIER CREAM KERODEX® 50 Barrier Cream

A Water Soluble, antiseptic cream base, effective against contact with enamels, quartz dust, grease, sand, mica, lead dust, activated carbon, carbon black, spirit based ink, japan lacquers, graphite, jute and facilitates removal of oil when washing hands after work. (See ISI chart by scanning QR code.)

KAOLIN LIGHT & BENTONITE BARRIER CREAM KERODEX® 52 Barrier Cream

A Water Soluble Cream Base, designed as both a barrier cream and to assist cleaning hands after handling paints. It is also effective in processes like handling glass fibre, synthetic resin laminates and also recommended for use with printing inks and solvent based washes. (See ISI chart by scanning QR code.)

KERODEX WATER REPELLENT BARRIER CREAMS

Effective against substances involving aqueous solutions and liquids. It does not dissolve with sweat and friction. Protection lasts 3 hours under normal conditions and gets pushed out by hydrostatic pressure.

Application for Water Repellent Barrier Creams

Before work 2 gms of the cream should be applied to clean dry hands up to the wrists and 4 gms upto the elbows. Re-apply every 3 hours under normal conditions. The hands may be washed normally during this period without affecting the protective film on the skin.

ZINC OXIDE BARRIER CREAM KERODEX® 71 Barrier Cream

A Water Repellent Cream Base effective against contact with acids, alkalies, resins, industrial compounds, chemicals, solvents, detergents, urea, formaldehyde compounds, waste contaminants, hospital and biomedical waste. (See ISI chart by scanning QR code.)

DIMETHICONE & BENTONITE BARRIER CREAM KERODEX® 72 Barrier Cream

A Water Repellent Cream Base formulated to protect the skin against phosphate ester compounds effective when working with hydrocarbon solvents like trichloroethylene, acetone, air turbine fuel, skydroll, carbon tetrachloride, toluene, benzene etc. **Protects the hands and skin against splashes of these substances.** (See ISI chart by scanning QR code.)

WHAT IS KERODEX LIGHT DEFLECTANT CREAM?

It is a tropical formulation applied to the surface of the skin. Formulated as a bland cream incorporating a combination of deflectant agents. It protects the skin which is exposed to photosensitising material in combination with irritant rays causing skin cancer, photodermatitis, skin burns, loss of elasticity and other issues.

KERODEX LIGHT DEFLECTANT CREAM

Protects the skin against the photosensitising action and exposure to ultraviolet light. It does not dissolve with sweat and friction. Protection lasts 3 hours under normal conditions and gets pushed out by hydrostatic pressure.

Application for Light Deflectant Cream

Before work 2 gms of the cream should be applied to clean dry hands up to the wrists and 4 gms upto the elbows. Re-apply every 3 hours under normal conditions. The hands may be washed normally during this period without affecting the protective film on the skin.

PARA AMINO BENZOIC ACID CREAM KERODEX® Light Deflectant Cream

A Water Repellent Cream Base that prevents photodermatitis caused by harsh sunlight and ultraviolet radiation. Protects the skin which is exposed to photosensitising material in combination with irritant rays. **It can be used on the face, hands and forearms** and absorbs irritant rays arising from the welding processes, furnace operations, coal and tar handling, working in by-products plants, coke-oven department of steel plants and heat treatments. (See ISI chart by scanning QR code.)

HAND CONDITIONING CREAM

Application for Hand Conditioning Cream

After work 2 gms of the cream should be applied to clean dry hands up to the wrists and 4 gms upto the elbows.

BORAX HAND CONDITIONING CREAM KERODEX® Hand Conditioning Cream

A Water Repellent Cream Base specially designed to play an important part in the general care of skin. Where work involves contact with substances which have a degreasing or abrasive effect on the hands, leaving them dry, harsh or cracked, the hand conditioning cream should be used consistently **after work**, it will keep the skin in a healthy condition. It helps repair damage done during the day by ultraviolet rays, pollution, weather, bacteria and in the process of skin regeneration. Can also heal dry and cracked skin.

USE KERODEX BARRIER CREAM REGULARLY FOR CLEAN & SAFE HANDS
